Initial Prompt:

Create a personal portfolio website and make sure to include the sections below

Name:
Shanaiah Dawn D. Cava

Description:
Entry-level UI/UX Designer with a strong foundation in user-centered design, visual identity, and digital product development. Skilled in transforming concepts into intuitive, polished interfaces through research-driven processes and creative problem-solving. Known for adaptability, collaborative spirit, and meticulous attention to craft — eager to contribute meaningfully and grow within forward-thinking design teams.

Education:
B.S. Interdisciplinary Studies — Ateneo de Davao University · Minor in Media and Technology
Senior High School — Davao Doctors College
Junior High School — Davao City National High School

Skills:
Design & Tools Figma · Adobe Creative Suite (Photoshop, Illustrator, InDesign) · Wireframing · Prototyping · User Research · Visual Identity Design
Professional Communication · Cross-functional Collaboration · Attention to Detail · Adaptability · Creative Problem-Solving

Projects:
UI/UX Designer | SysDev 2023 – 2024
- Designed and iterated user interfaces for a software development project, following user-centered design principles.
- Produced wireframes, mockups, and interactive prototypes using Figma to communicate design intent to stakeholders.
- Conducted usability reviews and incorporated feedback to improve navigation flow and visual consistency.
- Collaborated with developers to ensure pixel-accurate implementation of approved designs.

UI/UX Designer | Cateneo Website Project 2022 – 2023
- Led the end-to-end UI/UX design of the Cateneo website, from initial concept and information architecture to high-fidelity mockups.
- Created a cohesive visual identity system — color palette, typography, and iconography — aligned with the brand's academic character.
- Performed iterative user testing and translated findings into actionable design improvements.
- Delivered responsive design assets optimized for both desktop and mobile viewports.

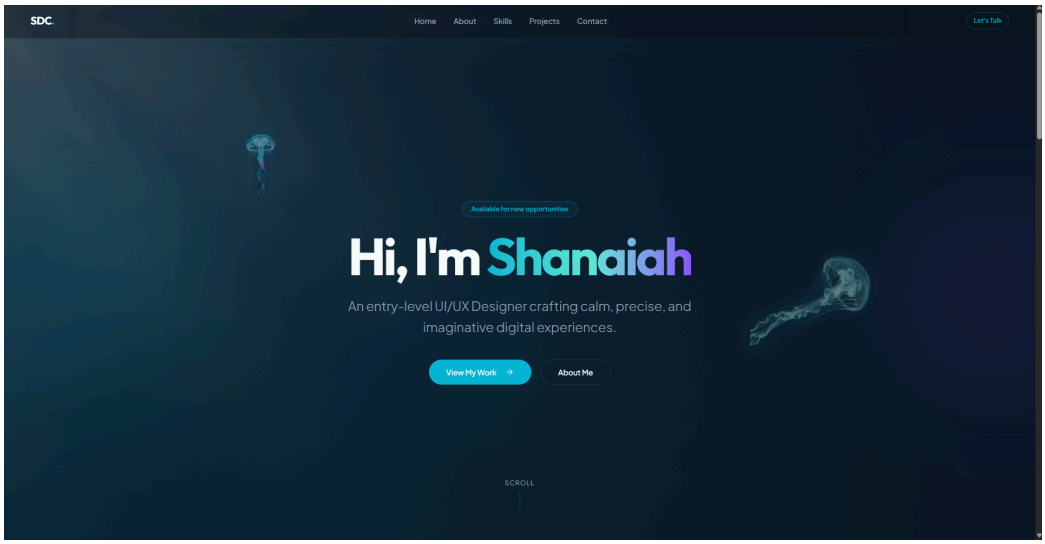
Use a clean, modern design with jellyfish decor
Make it responsive, visually appealing, and easy to use with cool pop-ups

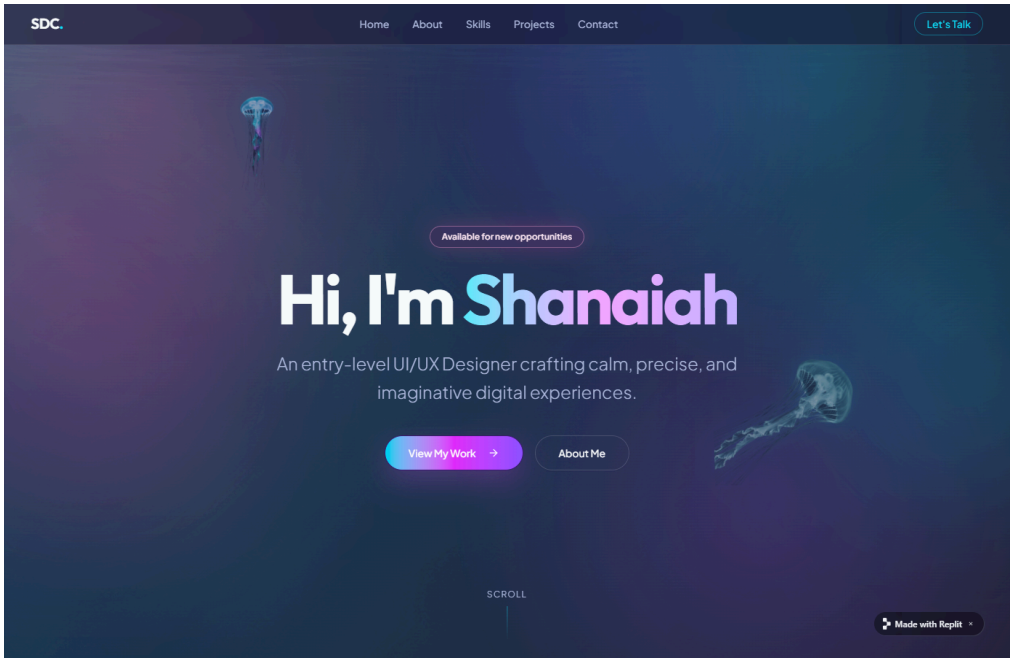
First Result:



Refinement Prompts:

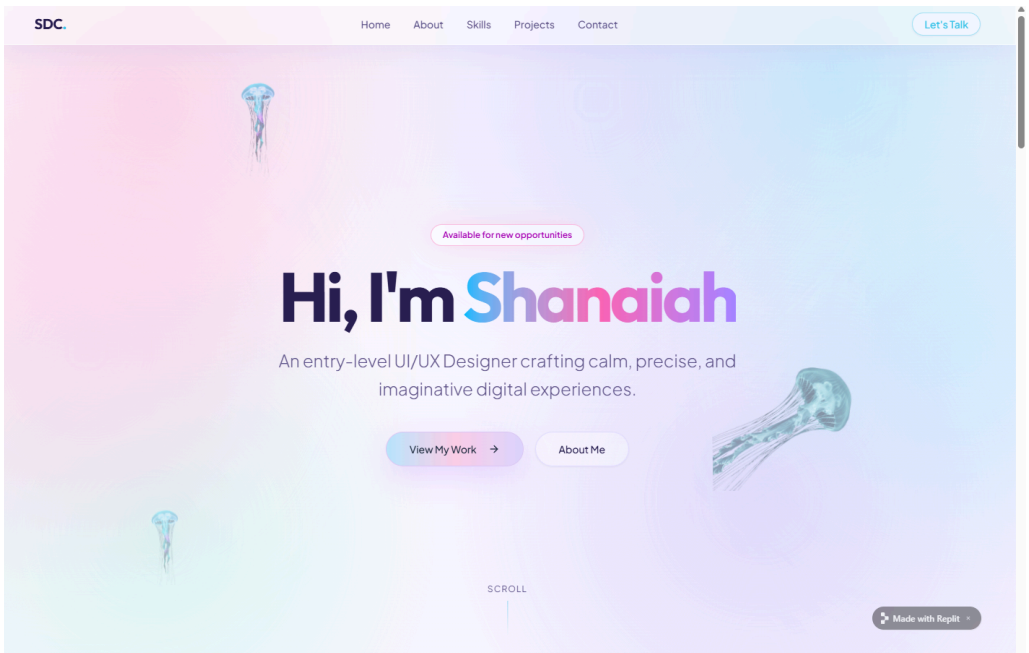
1st Prompt:

- sysdev is not a project, it is an organization I work for, fix the year of that from 2025-2026
- The Cateneo website should be 2026, and in cateneo i am the project head
- Fix the email, it should be sddcava@addu.edu.ph, and fix the phone number, it should be 099592047463
- Make it more colorful
- Make sure it is ready for mobile



2nd Prompt:

- The colors should be pastel
- Add more jellyfish. Why is it only in the hero section that more is added



3rd Prompt:

Redesign and enhance my portfolio website with a stronger UI/UX focus. The goal is to make it more modern, unique, and visually cohesive while improving usability and accessibility.

Design & UI Improvements

- Replace all CTA buttons with **solid pastel colors (no gradients)**.
- Ensure CTA colors **strongly contrast with the background** so they stand out clearly and feel clickable.
- Improve overall UI consistency (spacing, typography, alignment, and visual hierarchy).
- Make the design feel more **unique and memorable**, not generic or template-based.

Sections Improvements

- **Hero Section:**
    - Improve layout and visual impact.
    - Add a more compelling introduction that highlights my role as a UI/UX designer.
    - Include a short, engaging description that highlights my skills, passion, and design focus.
- **Projects Section:**
    - Convert the project display into a **carousel/slider format**.
    - Make it smooth, interactive, and mobile-friendly.
- **Footer:**
    - Redesign to feel more modern and complete.
    - Include better spacing, cleaner layout, and improved visual balance.
    - Add relevant links (socials/contact) in a more structured way.

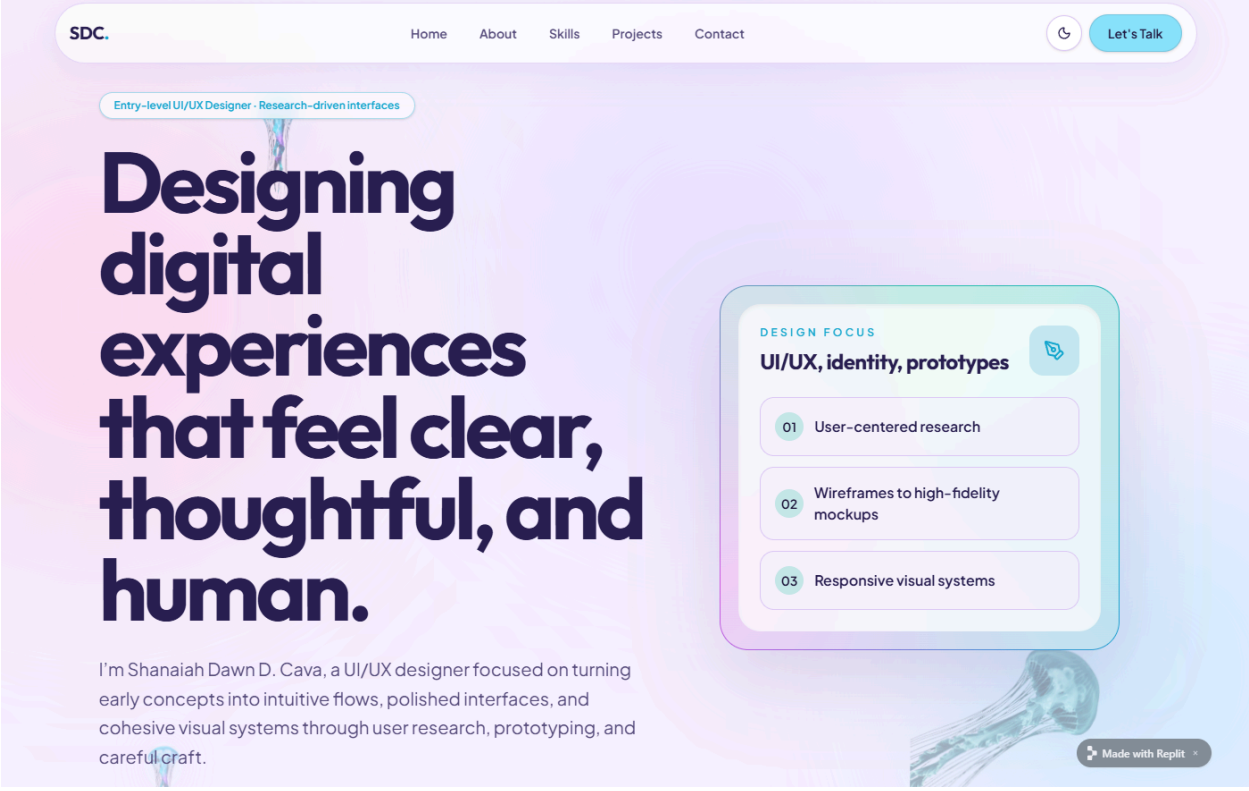
Additional Features

- Add a **Dark Mode / Light Mode toggle** with smooth transitions.
- Ensure both modes are visually balanced and accessible (proper contrast in both themes).
- Add subtle animations/transitions to improve UX (hover effects, button feedback, section transitions).

Overall Goal

- Create a portfolio that feels polished, professional, and creatively distinctive, with strong UI/UX principles, better storytelling about me, and improved user interaction throughout the site.

Final Output:



Link to published website: https://shanaiah-dawn-portfolio--sddcava.replit.app/

What worked well? The AI was able to accomplish some of the tasks I needed, giving me a decent starting point for my website. It helped spark ideas and gave me a foundation I could build on. It also gave me the opportunity to be free, get creative, and let my imagination run wild to create something I truly desired.

What needed manual fixing? The design and color choices did not match my personal style at all; they felt unrefined and lacked character. I had to keep going back and adjusting my prompts just to get closer to what I originally had in mind. The overall layout also felt very generic, like something I had already seen a hundred times before, which is why it took a while to make it feel a bit more unique and visually better.

What did you learn about prompting? I realized that getting specific results from prompting is harder than it looks. The AI doesn't always pick up on ideas the way you intend, so I had to be more deliberate and creative in how I described things. It also showed me that my prompts need to be clearer and more precise if I want the output to actually reflect what I am going for.
